

La formation du charbon, du pétrole et du gaz, leur utilisation et les conséquences pour la Terre

- Tourbe
-
-

Production d'énergie et transport.

ATMOSPHERIQUE
Forte teneur en CO2

CONSEQUENCES

• Modification des flux de CO2 :

○ Sans activités humaines :

-
-
-

○ Avec l'Homme :

-
-
-

• Montée des eaux (cf activité 3), changement climatique, etc.

• Biodiversité :

-
-

TEMPS GEOLOGIQUES

UTILISATION

ATMOSPHERIQUE
Faible teneur en CO2

FORMATION

ATMOSPHERIQUE
Forte teneur en CO2

Production d'énergie pour l'industrie, le chauffage, etc...
